# About Jamestown Advanced

## OUR BUSINESS STORY

For over 30 years, our name—Jamestown Advanced Products—has been synonymous with quality. We laid down our roots in Jamestown, New York in 1987, as a fabrication shop started by Jon Wehrenberg. Two years later, Jon's daughter Wendi Lodestro joined her father at Jamestown Advanced Products. In 1991, Wendi's husband Lee Lodestro signed on in an engineering capacity.

In 1994, Jon and his wife began touring the country, camping along the way. Throughout their travels, Jon began to note campground equipment that could be made at his Jamestown factory. In 1995, we began manufacturing a line of campground and park products.

In 1999, Wendi and Lee bought Jamestown Advanced Products, committed to helping her family's business offer her parents retired. In the years since, sales and employment doubled. Led by Lee and Wendi, Jamestown Advanced Products prides itself on being a woman-owned, American-manufactured sheet metal fabricator. In addition to our park, recreation and campground equipment, we offer custom sheet and plate fabrications, and electrostatic powder coating services.

Our expertise in designing, welding and fabrication of steel products has enabled us to produce top-quality, American-made campground and park products that are extremely durable, yet competitively priced.

## GSA PURCHASING

Jamestown Advanced Products warmly welcomes government purchases through GSA Advantage. As a small, woman-owned enterprise that manufactures all of its products in New York State, we offer preferred pricing for government purchasers. We accept the government commercial credit card. You will find our preferred pricing under contracts **GS-03F-008DA** and **GS-03F-009DA**. Please contact us via telephone for the GSA Advantage price list and conditions.
