

OWNER PORTAL

Our owner portal allows you to access any meter from any of your parks in real-time. Need to bill a customer while sitting on the beach in Florida? We can help!

- ✓ Easily monitor and manage energy usage and outages in real-time
- ✓ Provides transparency to the campground owner
- ✓ An instant return on your investment
- ✓ Export data in multiple different formats
- ✓ Optional data analytics
- ✓ Self-service reporting
- ✓ Integrate billing with your reservation system

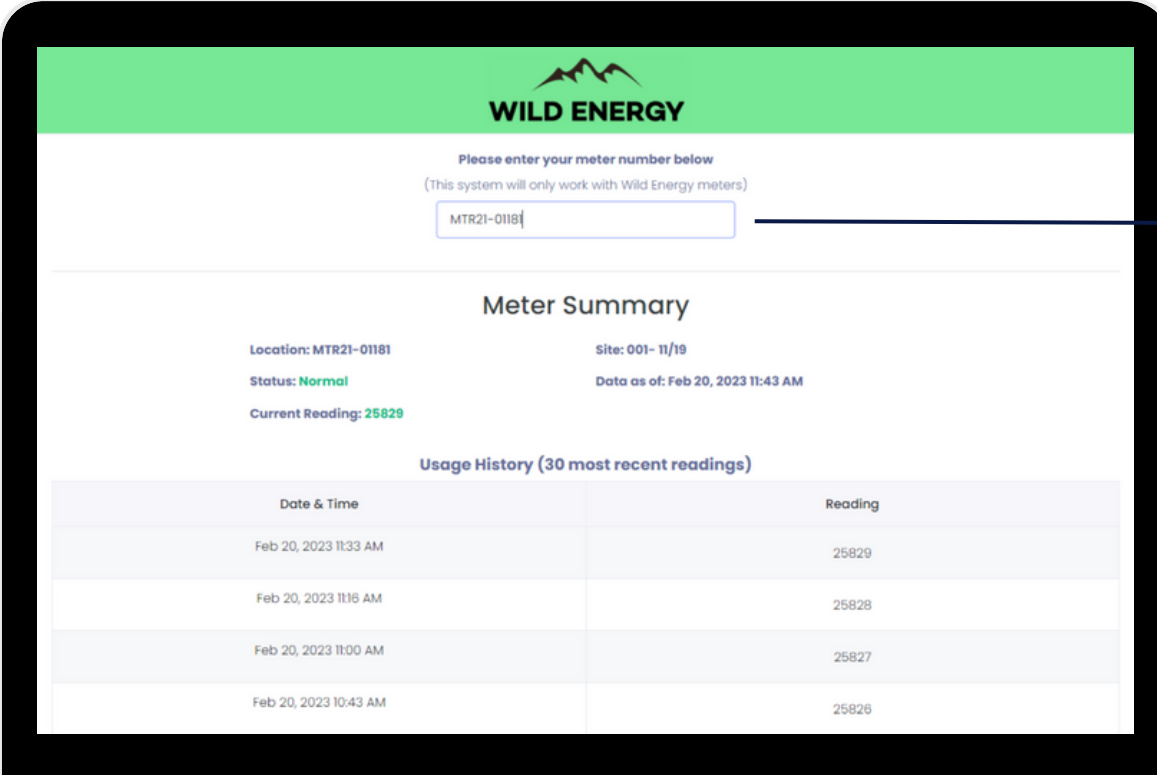

Easily manage all of your meters and usage and in one place.

Our guest portal allows consumers to look at their own electrical consumption and see in real-time when energy was used. This provides transparency to the metering process, data, and reliability of the system.

- ✓ Allows guests to see their own usage instead of calling the office
- ✓ Provides transparency to the guest
- ✓ Cuts down on calls from guests to the campground management/staff
- ✓ Available in the App My Community mobile application
- ✓ Puts guests in charge of their own energy consumption
- ✓ Awareness of energy use results in energy conservation
- ✓ Real-time data

Guests easily enter their meter number and a complete energy usage summary populates.

The screenshot shows the Wild Energy Guest Portal interface. At the top, there is a green header with the Wild Energy logo. Below the header, a prompt asks the user to enter their meter number, with a note that the system only works with Wild Energy meters. A text input field contains the meter number 'MTR21-0118'. Below this, a 'Meter Summary' section displays the following information: Location: MTR21-0118, Site: 001- 11/19, Status: Normal, and Data as of: Feb 20, 2023 11:43 AM. The current reading is 25829. Below the summary is a 'Usage History (30 most recent readings)' table with two columns: 'Date & Time' and 'Reading'.

Date & Time	Reading
Feb 20, 2023 11:33 AM	25829
Feb 20, 2023 11:16 AM	25828
Feb 20, 2023 11:00 AM	25827
Feb 20, 2023 10:43 AM	25826
